DECISION:

☒ 1. Further Remedial Site Assessment under CERCLA (Superfund) is not required because:

☒ 1a. Site does not qualify for further remedial site assessment under CERCLA (No Further Remedial Action Planned - NFRAP)

☐ 1b. Site may qualify for action, but is deferred to:

☐ 2. Further Assessment Needed Under CERCLA:

2a. Priority: ☐ Higher ☐ Lower

2b. Other: (recommended action) NFRAP (No Further Remedial Action Planned)

DISCUSSION/RATIONALE:

DECISION: Further remedial site assessment under CERCLA is not required. The NFRAP decision is based on the HRS Site Score which is below the 28.5 cutoff score.

SITE DESCRIPTION: From 1964 to 1991, the facility processed materials such as brass, lead/copper solder, nickel alloys, mercury, and copper. Currently, the southern portion of the site is utilized by a moving company. The company warehouse and parking area cover the majority of this area. The northern portion of the site is unpaved and partially vegetated. In 1990, Interstate Metals entered into an Administrative Consent Order (ACO) with the NJDEP. In 1997, the current site owner submitted a Memorandum of Agreement (MOA) application for Non-Residential Properties to the NJDEP. The remedial action MOA was executed in March 1998.

SITE ASSESSMENT: Analytical data indicate the presence of contaminants (metals) in the on-site soil and sediment samples. There is potential for a release of contaminants into groundwater. However, drinking water supplies for communities within the site vicinity are obtained from sources greater than 4 miles from the site. Frank Creek is the nearest downstream surface water body. An estimated 13 people reside within 200 feet of the site. There are no schools or day care facilities within 200 feet of the property.
